Make better business decisions.

The myAccount portal from McDougall Energy is a powerful and secure business tool that helps you manage and optimize your fuel investment. By capturing every detail about your fuel usage and then making this data easy to access and analyze, myAccount helps you minimize your fuelling costs and improve your profitability.

INFORMATION

View and download fuel type and volume data for every delivery - searchable by date, order number, invoice number, delivery number, vehicle or tankfilled, and delivery location (including live GPS data)

Obtain current and historical fuel pricing data that is searchable by delivery location and fuel type

Retrieve and download invoicing information that can be searched by date, invoice number, delivery location and fuel type

Monitor your account balance, past payments, new charges and payment due date

INSIGHTS

Review a dashboard with multiple pie-charts illustrating important fuel-usage metrics: total volume of fuel purchased per delivery location, purchases by fuel type, and fuel consumption for up to 10 vehicles

Select your desired criteria and then generate Excel reports that help you understand trends and identify improvement opportunities

Equip your management team with revealing views into the company's fuel purchasing patterns by having reports automatically delivered to their inbox

IMPACT

By enabling you to save money and operate more efficiently, the myAccount portal helps keep your business moving forward.

McDougall's myAccount portal enables us to track fuel costs right down to the individual machine. So, when we're putting together a bid for a new job, we can forecast our costs more accurately and ensure that our quote is as competitive as possible."

- Rupert Ambler, President, Ambler Construction

Our fleet trucks fuel up dozens of times a day. The details of every transaction are accessible within minutes on McDougall's myAccount portal. Since it's simple to manipulate the data and download reports, our admin team finds it easy to closely monitor our operating costs.

- Pat Seward, Fleet Manager, Gordon Food Services
